3. Students and tutors can rate each other after one tutoring session.

4. Recognize the ability of tutor to teach a course.

User stories

Sprint 1

(5) As a student in an advanced CS course, I want to have a tutor to help me with the tough CS course so that I can have a better academic performance.

(4) As a top student in the major, I want to tutor students so that I can make extra income to spend.

(3) As a student who tried online tutoring, I want to have a student who took the course before to teach me so that the learning experience would be more adequate and efficient.

(2) As a student in a class that TA sections are always crowded, I want to have a tutor who can concentrate on teaching me so that I don't need to waste time waiting for TA's help in section.

(1) As a student whose current class used to be taught by different professor, I want the tutor took the course taught by the same professor so that I can have make my assignment more appealing to the professor.
