Sprint 2 Plan Report
Product Name: SlugStudy
Team Name: Slug Study
Sprint Completion Date: Nov 3, 2019

• Actions to stop doing:
These are the activities or actions the team determined they should stop doing. This is the answer to the question, "What things should we stop doing?" The items should take the form of a brief description of what the team wants to stop doing, followed by a brief explanation. If there are no items, this section should describe why the team is completely satisfied with their current process. Examples: The team should stop holding daily scrum meetings at 7am in the morning, because nobody can make that meeting time. The team should stop allowing daily scrum meetings to go over 15 minutes, because the meetings are less effective that way.

1. Scrum Meeting time being decided one day in advance
2. Stick on one solution to the goal
3. Reduce focus on research

• Actions to start doing: These are the activities or actions the team would like to start doing to improve their development process. This is the answer to the question, "What should we start doing?" The items should take the form of a brief description of what the team wants to start doing, followed by a brief explanation. Examples: The team should schedule more group work sessions, since these are very effective at getting work done. The team should be more accurate at estimating work tasks, since tasks were consistently under-estimated last sprint.

1. Assign fixed time segments for Scrum Meeting at the beginning of week
2. Learn from the accomplished project by others together
3. Upload files more frequently
4. Choose an alternative way when facing challenges
5. Focus on development stories

• Actions to keep doing: This is the answer to the question, "What is working well that we should continue to do?" The items should take the form of a brief description of what the team wants to start doing, followed by a brief explanation. • Work completed/not completed: This is a list of the user stories that were completed during the previous sprint, and a list of the user stories not completed during this sprint (but which were part of this sprint, and were in the sprint plan)

1. Using sheet for scrum meeting
2. Using text for instant messaging
3. Using Google Calendar to find a time that fits everyone
4. Integrating GitHub and Google into Slack.
5. Using Github Scrum Board
6. Scrum Meeting location - a fixed room
7. Attending workshops
8. Ask TA for help outside meetings with TA

• Work completion rate: This section should report the following: total number of user stories completed during the prior sprint. Total number of estimated ideal work hours completed during the prior sprint. Total number of days during the prior sprint. For the previous sprint, the user stories/day and ideal work hours/day figures should be reported. For sprints past the first sprint, this section should also provide the average user stories/day and average ideal work hours/day figures computed across all sprints to date. The final sprint burnup chart for the previous sprint should be available for viewing in the lab and an email of this chart sent to the TA/prof

     In the past two weeks, we were learning React.js, Flask, Firebase. We were also doing the assigned tasks, including DB set-up, Server set-up, specific webpage design and development.

     The total number of estimated Ideal work hours completed is 50. The actual total hours we used is 60.
